COSC835 Project Final Writeup Instructions

Micah Sherr

The final writeup should be formatted as a paper submission. At a minimum, the writeup should read as a (non-anonymized) workshop submission of at least 6 pages. However, unlike some workshop venues, the writeup must contain a section that reviews the existing literature in a manner that clearly differentiates the paper’s techniques from existing work.

 Longer-length writeups are also welcome.

There is no set organizational requirement for your writeup. Please organize it as you see fit. A reasonable paper might include the following sections:

- Introduction
- Related Work
- Motivation and Challenges
- Methodology
- Evaluation
- Discussion
- Conclusion

Again, the writeup is not expected to describe a complete system, nor is it expected to present finalized or comprehensive results. Rather, the expectation is that the paper describes a novel approach to some problem, and includes some preliminary results from a proof-of-concept implementation. The writeup may include a “future work” discussion (and as is tradition, does not imply a promise that the future work will actually ever be completed).

Please format your paper in 2-column format using a 10pt font (using \LaTeX{} is strongly recommended). The paper should be submitted, in PDF format, by email to me no later than 11:59pm on April 30th, 2012. Word documents and text files will not be accepted. Please do not submit \LaTeX{} source files.

Also, please note that the project presentation will take place during the class’ normal 12pm meeting time.
